

Economics

Investigate how the supply and demand for goods and resources are globally intertwined with videos, lesson plans, and interactive games in Economics. Preview a lesson on personal finance using a video on "Digging Out of Debt," practice running a start-up business with an interactive game, or initiate a classroom debate over the use of vouchers for private schools using a pre-developed lesson plan. The Federal Reserve Bank (the Fed), entrepreneurship, and mercantilism are also explored in Economics.

Topics and resources in the following areas:

- Interdisciplinary Dynamics
- International Economics
- Macroeconomics
- Microeconomics
- Personal Finance
